## Summary

Stackoverflow : <https://stackoverflow.com/users/5582655/dılo-sürücü>

Github : <https://github.com/diloabininyeri>

Youtube : <https://www.youtube.com/c/dılosürücü>

I have been working as a software developer for 12 years actively(this year 2022), I am originally a physics graduate, I worked as a full-stack frontend and backend developer in most projects, I have mostly written PHP for the last 6-7 years. Big data and artificial intelligence always attract my attention. I have been working on these two issues frequently lately, When the team could not find a developer to code a language they needed, I took this responsibility many times and fulfilled it, yes I am a PHP developer, but I don't just write PHP.

I write in languages such as golang, python, javascript bash, etc, I have worked in many different positions for years, as a developer, as a server administrator, as a team leader, etc. software is not just about writing code software is a data structure

## Experience

### Software Engineer

#### Doping Hafıza

Sep 2020 - Sep 2021 (1 year 1 month)

An application that received millions of monthly visitors was also a company that wanted professionalism such as video streaming.

image recognition processes, Linux systems, performance, code review
